About Me

I am a dedicated React Programmer with a strong foundation in front-end technologies like React, JavaScript, HTML, and CSS. While I have experience with Java, my true passion is creating captivating and user-friendly web applications. With over 1 year of full-stack development experience, I'm well-equipped to tackle a wide range of web development challenges using problem-solving skills while staying up-to-date with industry trends

Professional Experience

Albania Lab | Junior / Software Developer
Nov 2022 – Present

Experience working on the development of backend applications using the Spring framework and the Java programming language, applying the agile methodology, and in particular Scrum. In addition to my professional experience, I have independently built several web applications using React, showcasing my proficiency in both front-end and back-end development.
